STRASSMAYR BF 290 ROAD WIDENER

The quickest and most economical way to carry out roadside works and road widening.

The BF 290 road widener is designed for application of loose materials and bitumen on roadsides. The universal mount allows mounting the machine on the arms of a wheel loader, backhoe loader or tractor. The design of the screeds allows the application of material at a width, regulated by hydraulic, stepless control, from 550 mm to 1,100 mm. Additional widening devices allow you to broaden the working width to 2,000 mm.

The STRASSMAYR BF 290 road widener is available in two options:
 - right-sided widener allows application of material on the right side of the road
 - left-sided widener allows application of material on the left side of the road

Technical data:

Application width:	550 mm – 2 000 mm
Height of layers	From 270 mm to 160 mm
Roadside angle	+/- 8 Grad
Application efficiency	300 t/h
Weight of machine	2 500 kg

Conveyor belt:	
Width	380 mm
Length	2 800 mm
Speed control	0 – 120 m/min
Hydraulic drive	

Only two people are required to fully operate the road widener.

Quick and efficient application of bitumen is possible thanks to the simple operation of the machine.

The universal mount allows mounting the machine on the arms of a wheel loader, backhoe loader or tractor.
